Innovation in Motionsm

Pressure Systems

SOUTHWEST OILFIELD PRODUCTS, INC.

is the unquestioned leader in the design and manufacture of premium mud pump components and expendables. The fluid end modules, pistons, liners and other products produced by Southwest® are the recognized industry leader for performance and durability. It is not surprising that OEM manufacturers of mud pumps are among Southwest's® largest customers. The innovative applications developed by Southwest produce greater performance on any brand of pump which, in turn, translates into greater profitability for the end user.

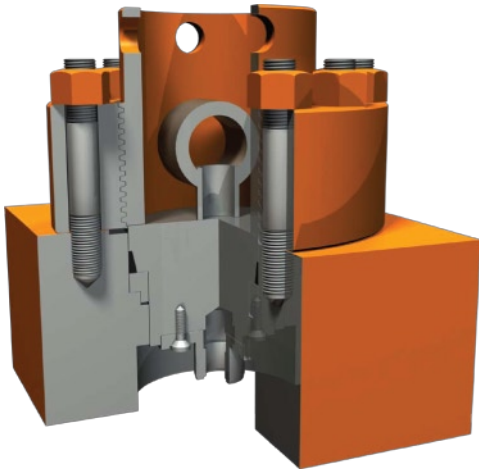

For over 25 years the Dual-Duro® has been the piston of choice for drilling contractors world-wide. The one-piece bonded design combined with a dual-durometer polyurethane produces a piston with unmatched performance in high pressure and oil based mud applications

Utilizing the same bonded construction design from our industry leading Dual-Duro® piston, the Fail-Safe® Black Cat piston offers excellent performance in applications where a rubber piston is required.

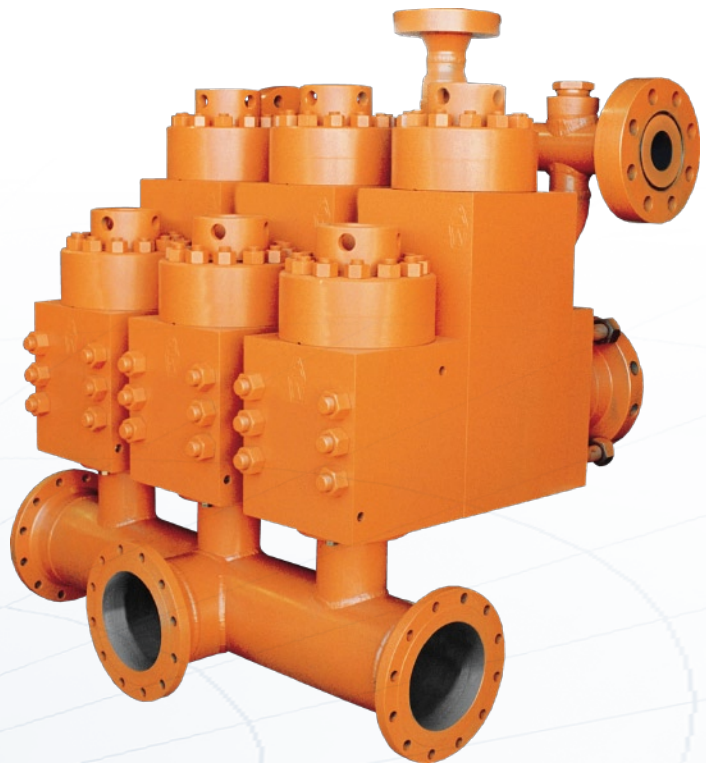

Whether you are looking for the economy of our Grayloy® chrome alloy material or the extended run times available with the premium Zirconia models, Southwest® Oilfield offers the highest quality liners for the most demanding drilling programs.

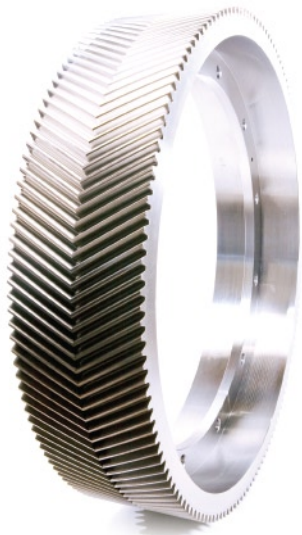

Addressing weaknesses in the competitor's valve cap arrangement, our Quick-Change Valve Covers offer enhanced sealing - reducing the chance for module washouts. Requiring no modification to the fluid end during installation, the Quick-Change Valve Cover System can save time and money on costly repairs.

Often imitated but never duplicated, Southwest[®] Oilfield's 2-Piece "L" shaped fluid ends have become the recognized standard. Manufactured from heat treated 4130 forgings and equipped with our Quick-Change valve cover system, Southwest[®] Oilfield's "L" Shaped modules offer unmatched performance for any mud pump.

Increased safety and faster change outs is the hallmark of Southwest[®] Oilfield's Quick Change Hydraulic Liner Retention System. Our patented design eliminates the need for hammers and wrenches without compromising sealing or alignment of the liner.

Pressure Systems

Designed and manufactured in the USA, Southwest® Oilfield's mud pump gear and pinion sets offer exceptional value. Developed in accordance with AGMA standards, Southwest® gears and pinions meet or exceed OEM specifications.

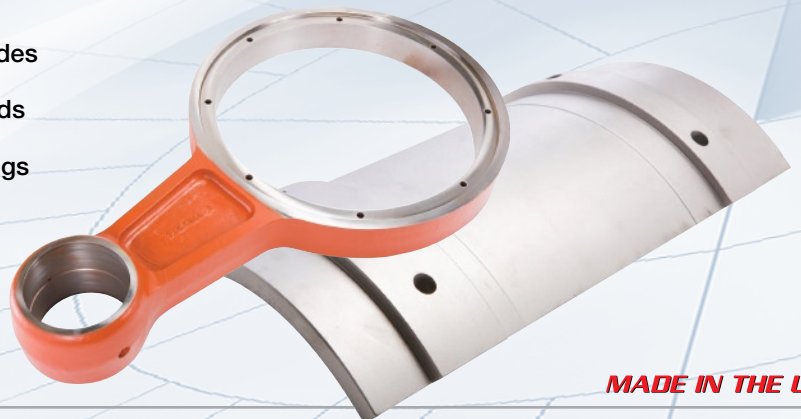

Our full open valves and seats provide maximum fluid flow. With a forged steel valve body and polyurethane inserts, this valve offers reliable performance at an economical cost.

Expanding on Southwest® Oilfield's reputation for Quality and Service, we are now pleased to offer replacement power end components for triplex mud pumps including:

- Crossheads
- Crosshead Guides
- Connecting Rods
- Bearing Housings
- Bearings

Pressure Systems

OFFERINGS INCLUDE:

Fluid Ends

- Southwest[®] 2 Piece "L"
- OEM Replacement

Mud Pump Expendables

- Pistons
- Liners
- Wear Plates
- Valves & Seats

Fluid End Components

- Valve Covers
- Liner Retention Systems
- Piston & Extension Rods

Swivel Expendables

- Washpipe & Packing

Mud Pump - Power End

- Gears & Pinions
- Crossheads
- Crosshead Guides
- Connecting Rods

High Pressure Components

- API 6A
- Manifolds
- Studded Crosses
- Studded Tee's
- Studded Elbows

Refurbished Equipment

- Fluid End Modules
- Strainer Crosses

Southwest Oilfield Products Service Dept.

Servicing all makes and models of pumps in the industry.
